

Eco Tip Week 6 - The importance of neighbours.

During lock down many of us saw the power of community with WhatsApp and Facebook groups springing up and being used like never before. What also stood out was just how they can reduce waste. Why not take the opportunity to energise your neighbourly network around this or build a new one? Offer car space when you do a tip run, offload excess food before a holiday, share your green bin or compost bin, giveaway food ordered in error, pass on hand me down clothes or toys, share tools, pass on vegetarian recipes, bring back in season food from a local shop or farmers market or organise a plant swap group. There is plenty of scope for ideas to work together as a team!
